Dear Sir or Madam,

I am a diligent, self-motivated Computer Science undergraduate student pursuing my 2nd year in B.E (CSE) degree at Chaitanya Bharathi Institute of Technology (CBIT), Hyderabad, India. I am writing to express my interest as a software developer intern at JP Morgan Chase 2020.

I believe it's an art to develop a good software and one needs to be smart as well as creative to be a good software developer, a combination of these two qualities makes me a perfect fit for this position. With my rigorous coursework, my innovative mindset and affinity for problem solving I am pleased to apply for this Job position.

As noted on my resume, I spent this summer interning at CBIT Open Source Community where I focused on development of web applications using latest technologies such as Javascript, HTML CSS, Bootstrap and worked on various frameworks like Django with Python. I gained comprehensive practical knowledge of deployment and making real-time projects. During this time, I developed a strong passion for Problem Solving skills and improving my Technical skills while working on COSC project where I got opportunity to develop front-end system and Django, REST APIs services for back-end.

I am eager to contribute my skills as a self-managed and passionate individual to work in J P Morgan Chase. Attached to the site is my resume with additional information about my education and experience.

Thank you for your time and consideration, I look forward to hearing from you.

Sincerely,
Kini Sanjula Dasari.
